Table 1 Comparative table for Section 3.2.S.6.1 Description of the Container Closure System for tenecteplase

Current **7776-s610al0101**	**Proposed** **206893_2808118_3**	**Comments/justification for the change**
Current document only contains a single table stating that “Pre-sterilized stainless steel tanks” are used as container closure system.	A state-of-the-art document is provided, including a description of the manufacturing equipment, a schematic drawing of the vessels and associated cleaning procedure	To comply with current regulatory expectations.
Size/volume of tanks/vessels are not described	120 L cryo-vessel tanks can be used for drug substance handling.	The addition of the information for 120 L cryo vessel is only an editorial change to distinguish between different cryo vessel sizes. The 120 L vessel size was used historically and will be used in the future.
