This document may not - in full or in part - be passed on, reproduced, published or otherwise used without prior written permission.

To align with current regulatory expectations, section 3.2.S.2.3.2 has been updated to a state-of-the-art description. Multiple individual documents were consolidated into a single document, and the raw materials were classified into defined categories and linked to respective production stages.

Table 1 lists the changes between the currently approved and the proposed Control of Materials - Raw Material Specification for Reagents, Solvents and Auxiliary Materials for tenecteplase as provided in dossier section 3.2.S.2.3.2
